EDUCATION

BCA — Bachelor of Computer Applications

Sree Maatha Degree College, Hospet
(VSK University — Result Awaited)
2026

Pre-University Course (PUC)

Govt. Junior College, Gangavathi

10th Standard

Sahithi Vidyalaya, Kampli

CERTIFICATIONS

- Wipro — Learning Program
- Power BI — Skill Nation / Jatan Shah
- AI for Business
- Critical Thinking in the AI Era
- Growth Engine for Your Business

PROFESSIONAL SUMMARY

Self-taught GenAI Developer and Product Engineer with 2 years of independent experience building 30+ live AI applications. Founded and closed one startup (HireVix), then pivoted to build 11 live product experiments — AI tools for agriculture, education, legal access, and hiring. Known for relentless execution, problem-first thinking, and a founder's mindset; committed to seeing every project through to completion.

EXPERIENCE

Product Explorer (Self-Directed)

2024 – Present

- Designed, built, and shipped 11 live AI startup models end-to-end, including **SINO** (multi-agent AI platform with real-time conversational orchestration), **Nyay AI** (multilingual legal assistant supporting 9 Indian languages with FIR draft generation and PDF export), **FasalGuru** (crop disease detection using Gemini Vision for farmers), and **Hallucination Catcher** (RAG evaluation dashboard with LLM-as-judge and real-time hallucination scoring).
- Deployed all projects on Vercel and Render, managing the full lifecycle from idea to live deployment independently, without external support or funding.

Founder — HireVix

2023 – 2024

- Built an early-stage hiring platform for remote workers to test market viability.
- Learned the gap between working code and a sustainable business; the outcome redirected my approach toward rapid, disciplined product experimentation.

NOTABLE PROJECTS (LIVE PRODUCTS)

Ek Sawal, 4 Experts

Single query analyzed by four distinct AI personas, demonstrating advanced prompt engineering.

Kisan Daily Briefing Agent

Agentic AI delivering real-time weather and farming advisories via SSE streaming.

ShikshaBot

AI NCERT tutor for Class 6–12 students using Gemini/Groq LLMs.

Sarkari Yojana Finder

RAG-powered chatbot for discovering Indian government welfare schemes.

KisanBazaar

Farmer-to-buyer marketplace cutting out middlemen.

AI Resume Screener

Compares resumes with job descriptions to generate match scores and hiring recommendations.

Stock Sentiment Analyzer

Real-time market sentiment analysis using news and social media data.

ACHIEVEMENTS

- Tech Vistara Hackathon Participant — built and presented an AI prototype end-to-end within the event's timeframe.
- Built 30+ independent AI applications (11 currently live) with zero mentorship or formal internships.
